License Agreement

Pizza Doggy's Game Assets

November 1, 2026

This License Agreement governs the use of digital assets purchased or otherwise obtained from Pizza Doggy ("Assets"). By downloading, purchasing, or using the Assets, you agree to the terms of this Agreement.

1. Grant of License

Pizza Doggy grants you a non-exclusive, worldwide, perpetual license to use, modify, and incorporate the Assets into your own projects, subject to the restrictions set out in this Agreement.

This license applies to both commercial and non-commercial projects. No additional royalties, licensing fees, or revenue-sharing payments are required for permitted uses of the Assets.

2. Permitted Uses

You may:

- Use the Assets in any video game, regardless of whether the game is commercial or non-commercial.
- Modify, edit, adapt, combine, or otherwise alter the Assets as needed for your project.
- Combine the Assets with your own content or other third-party content.
- Use rendered images, screenshots, videos, trailers, advertisements, store-page graphics, social media posts, promotional artwork, and other marketing or promotional materials relating to a game that incorporates the Assets.
- Display the Assets publicly as part of your game or its associated marketing and promotional materials.

3. Marketing and Promotional Materials

The Assets may be displayed in marketing, advertising, promotional, and informational materials for a game in which the Assets are used.

This includes, but is not limited to:

- Game trailers and gameplay videos;
- Screenshots and game previews;
- Store pages and storefront listings;
- Websites and social media;
- Advertisements and promotional campaigns;
- Press kits and media coverage;
- Crowdfunding campaigns;
- Promotional artwork and key art;
- Videos, livestreams, and other content showcasing the game.
- The assets may also be used in non-interactive media, including YouTube videos, video series, animated shorts, films, promotional videos, and other audiovisual productions.

However, the Assets must be incorporated into the game or non-interactive media or presented as part of the related content. Marketing or promotional materials may not provide the Assets in a form that allows users to easily download, extract, or otherwise obtain the Assets as standalone files.

For example, displaying a 3D model in a gameplay screenshot or trailer is permitted. Providing the original model file, texture file, or another readily extractable version of the Asset for download is not permitted.

4. Prohibited Uses

You may not:

- Resell, sublicense, redistribute, share, or otherwise make the Assets available as standalone files.
- Make the original or edited Assets available for download, whether for free or for payment.
- Include the Assets, whether modified or unmodified, in asset packs, resource packs, templates, open source projects, stock libraries, bundles, or similar collections where the Assets are provided for reuse by third parties.
- Use the Assets to create or distribute a competing asset library or product.
- Claim ownership of the original Assets or represent them as assets created by you.

- Make the Assets available in a way that allows third parties to extract or reuse them independently from your project.
- Use the Assets, in whole or in part, as training data, fine-tuning data, reference material, input, or prompts for the purpose of training, developing, fine-tuning, evaluating, or generating content using artificial intelligence or machine-learning systems.
- Use the Assets as input, reference, or source material for any AI or machine-learning system that generates, modifies, or assists in generating visual, audio, 3D, or other digital assets, including systems capable of producing derivative or substantially similar assets.
- Upload, submit, or otherwise provide the Assets to AI services, generative AI tools, machine-learning models, datasets, or similar systems for any of the purposes described above.

To make it short: Using generative AI in your workflow isn't forbidden. What's forbidden is using the assets themselves, or images or videos of them as training data or input for generative AI.

Modification of an Asset does not remove these restrictions. A modified version of an Asset remains subject to this License Agreement if it is substantially based on the original.

5. Ownership

The Assets remain the property of Pizza Doggy. This Agreement grants a license to use the Assets; it does not transfer ownership or copyright in the Assets to you.

You retain ownership of your original work and other original content that you create independently of the Assets.

6. Attribution

Attribution is appreciated but not required.

If you choose to provide attribution, you may credit:

"Game Assets by Pizza Doggy"

and provide an appropriate link to the source from which the Assets were obtained.

7. No Additional Restrictions on Your Game

You are free to sell, distribute, publish, monetize, or otherwise make your game available under terms of your choosing, provided that the Assets themselves are not distributed as standalone or reusable files in violation of this Agreement.

8. Transfer and Distribution of Your Game

You may distribute your game to any number of users and through any distribution platform, including commercial storefronts and digital distribution services.

End users may access and use the Assets only as incorporated into the game. You must not intentionally provide them with the Assets as separate downloadable or reusable resources.

9. License Termination

This license remains in effect unless terminated due to a material breach of this Agreement.

If you violate the terms of this Agreement, Pizza Doggy may terminate your license to use the Assets. Upon termination, you must cease any further use or distribution of the Assets to the extent reasonably practicable.

10. Disclaimer

The Assets are provided on an “as is” basis, without warranties of any kind, to the maximum extent permitted by applicable law.

Pizza Doggy shall not be liable for indirect, incidental, consequential, or other damages arising from the use of the Assets, except where such limitation is prohibited by applicable law.

11. Acceptance of Terms

By purchasing, downloading, or using the Assets, you acknowledge that you have read, understood, and agreed to this License Agreement.

12. License Updates and Abuse Prevention

Pizza Doggy reserves the right to update, clarify, or expand this License Agreement from time to time in order to address new technologies, methods of misuse, abuse, exploitation, or other circumstances that may not be specifically anticipated by the current version of this Agreement.

Such updates may include additional restrictions or clarifications concerning the use, distribution, extraction, automated processing, artificial intelligence, machine learning, or other technologies involving the Assets.

The version of the License Agreement applicable to your use of the Assets is the version in effect at the time you obtained the Assets, unless otherwise required by applicable law. Updates are intended to clarify or address potential abuse and shall not retroactively invalidate uses that were expressly permitted under the applicable version of the License.
